

FACULTY BIOGRAPHY

Camille Nelson Kotton, MD, FIDSA, FAST

Clinical Director, Transplant and Immunocompromised Host Infectious Diseases
Infectious Diseases Division
Massachusetts General Hospital
Harvard Medical School
Boston, MA

Camille Nelson Kotton, MD, FIDSA, FAST, is currently the clinical director of the Transplant and Immunocompromised Host Infectious Diseases Program at Massachusetts General Hospital in Boston, MA. Dr Kotton previously served as the chair of the Infectious Disease Community of Practice of the American Society of Transplantation. Dr Kotton received her medical degree from the University of Chicago Pritzker School of Medicine in Chicago, IL. She then completed her residency at the Hospital of the University of Pennsylvania in Philadelphia, PA and her fellowship in infectious disease at Massachusetts General Hospital in Boston, MA. Dr Kotton is board certified in infectious disease.

Dr Kotton's clinical and research interests focus on cytomegalovirus, donor-derived infections, zoonoses, and travel and tropical medicine in the transplant setting.

Dr Kotton has served as the president of the Transplant Infectious Disease Section of the Transplantation Society. During her time as president, she participated in the development of international guidelines on CMV management after solid organ transplant, followed by updated versions published in *Transplantation*.

FACULTY BIOGRAPHY

Atul Humar, MD, FRCPC, FAST

Professor, Department of Medicine

University of Toronto

R. Fraser Elliott Chair, Transplantation

University Health Network

Director, University of Toronto Transplant Institute

Toronto, ON, Canada

Atul Humar, MD, FRCPC, FAST, is a professor in the Department of Medicine at the University of Toronto in Toronto, ON. He is also the R. Fraser Elliott Chair of the Organ Transplant Centre at the University Health Network and the director of the University of Toronto Transplant Institute. Dr Humar received his medical degree from the University of Ottawa in Ottawa, ON. He completed his residency and further training in transplant infectious diseases in Toronto and Boston.

Dr Humar's research interests are in virology with a focus on the pathogenesis of herpesvirus infections post-transplant. He is involved in both basic and clinical research assessing immunologic and virologic determinants of infection. Dr Humar has over 200 publications in these areas. His work was integral to the development of internationally used guidelines related to the management of infections post-transplant.
